Different Seismic Zones in India

Individuals asking about how many seismic zones there are in India can get complete knowledge from this section.

According to the seismic zoning map of the country, India is divided into four seismic zones. Also known as earthquake zones, these seismic zones are formed on the basis of scientific inputs related to the following:

- The Seismicity or the Frequency of Earthquakes in a Region
- Earthquakes That Have Hit the Country in the Past

The four zones of earthquake in India, as discussed below:

- Seismic Zone II: Zone II is classified as the low-damage risk zone. This is the least seismically active zone, meaning the areas that fall under these zones in India have a low chance of having an
